About Michael

Michael is a Web developer and QA engineer, with back and front end experience. Currently looking for an interesting technology company who embraces hiring new and energetic developers ready to fit into any team. Michael is open to a variety of roles, Q/A testing, developing and working with a team, depending on what is needed. Michael has been following a vigorous learning program since July 2014, after using self-paced practices with Code Academy and Free Code Camp and W3 Schools.

Summary of Skills

- Exceptional team member.
